SUMMARY

Final-year Computer and Information Sciences student, interested in finance and technology, and passionate about data analytics and working with real-time data. When a problem catches my attention, I stay with it until it is solved, and I can concentrate for long stretches while drawing inspiration from many places. I am always looking for problems to solve, without needing to reinvent the wheel; often the best solutions are the simplest. "Perfection is achieved when nothing else can be removed" is a motto I live by.

EDUCATION

Bachelor of Computer and Information Sciences in Application Development 2024 – 2026
The Independent Institute of Education (IIE) – Emeris, Cape Town · NQF 7, 360 credits

- 82.5% average to date, with 19 distinctions from 20 modules
