Summary

Final Year Computer Science student interesting in finance and technology. With a desire to work with real-time data and a passionate about data analytics. A mind that gets stuck on a problem until I solve it, I can concentrate and work for a long time while pulling inspiration from different things. I am constantly looking for problems to solve, not always needing to reinvent the wheel. Often the best solutions are the simplest. "Perfection is achieved when nothing else can be removed", A motto I live by

Education

Bachelor of Science: Computer Science in Application Development

Varsity College - Cape Town
